Alzheimer's Disease: A Report Of Progress In Research

Suzanne Corkin International Study Group on the Pharmacology of Memory Disorders Associated with Aging

Progress Report on Alzheimer's Disease AdLife HomeCare In. As the lead Federal agency for Alzheimer's disease research, the National Institute on Aging is responsible for producing a progress report on the research each year. This report is called the Alzheimer's Disease Progress Report. The report summarizes current scientific directions and highlights key findings from Alzheimer's research. The report is a comprehensive overview of the latest research on Alzheimer's disease.

The report is produced by the National Institute on Aging (NIA), which is part of the National Institutes of Health (NIH). The NIA is the primary federal agency responsible for Alzheimer's disease research. The report is available online and in print, and can be accessed through the NIH website.

The report is divided into several sections, including an overview of current research, a summary of recent findings, and a look at emerging trends in Alzheimer's disease research. The report also includes information on ongoing research projects, as well as a timeline of recent milestones in Alzheimer's disease research.

The Alzheimer's Disease Progress Report is an important resource for researchers, clinicians, and the general public. It provides a comprehensive overview of the latest research on Alzheimer's disease, and highlights key findings that have the potential to advance our understanding of the disease.

The report is available online and in print, and can be accessed through the NIH website. It is an important resource for researchers, clinicians, and the general public who are interested in learning more about Alzheimer's disease and its potential treatment options.
Intensifying the Research Effort is a 3-hour online continuing education CE/CEU course that reviews basic mechanisms.
