Ethical Issues in Social Science Research in Developing Countries. Ethical research becomes extremely important when dealing with human subjects. Research is the systematic process of collecting and analyzing information on human social relations. When dealing with human social relations, there are ethical issues that must be considered. This is because the ethical issues in research are different from those in real life. Researchers must consider the ethical implications of their work and ensure that they conduct their research in a way that respects the rights of the participants.

Social scientists are unprepared for many of the ethical issues that arise in their research, and, for criticisms of their ethics that seem to ignore such cherished ethical guidelines.
