
Nearly 200 years after his death, Thomas Jefferson continues to fascinate and mystify scholars and the public alike. Recently, it seems that every aspect of his life and work has been re-examined and re-interpreted. This has been especially true of his political rhetoric, which continues to be a subject of much debate and discussion.

In his First Inaugural Address, Jefferson declared that the new nation would be guided by the principles of civic virtue, the idea that citizens must sacrifice their personal interests for the good of the community. This rhetoric of virtue was meant to inspire the public to support the Constitution and the ideals of the American Revolution.

Jefferson's influence on American political rhetoric cannot be overstated. His ideas have been integral to the development of American democracy, and his legacy lives on in the work of his political successors.

In this volume, we offer a collection of essays that explore Jefferson's rhetoric of virtue and its impact on American political discourse. We hope that these essays will provide a deeper understanding of this important figure and his contributions to the shaping of American democracy.
